### **DETAILED ACTION**

Claims 1-14 are present within this instant examination, which is in response to applicant's correspondence on 10/23/2008. Examiner notes that claims 5, 12, and 14 have been cancelled by the applicant within applicant's correspondence on 10/23/2008, and therefore will not be given further consideration within this instant examination.

#### ***Priority***

Priority is claimed for this application to 10/09/2002 as noted within prior examinations and will be used for this examination.

#### ***Information Disclosure Statement***

Acknowledgment is made that a further (new) IDS has been submitted by the applicant and has been considered at this time. Examiner notes that a single non-patent document is disclosed within the new IDS.

#### ***Response to Arguments***

Applicant's arguments, see pages 5-6, filed 10/23/2008, with respect to claims 1-4 and 6-11 have been fully considered and are persuasive. The rejection of claims 1-4 and 6-11 has been respectfully withdrawn at this time.

#### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

Claims 1-4, 6-11, and 13 are allowable and respectfully renumbered 1-11 respectively.

The present invention pertains to the validation of a target apparatus by generating a test pattern for the target apparatus. The present invention recites features

such as: "a first input unit for inputting functional configuration information on the functional devices and connections among the functional devices; a second input unit for inputting a condition for the input/output sequence; a first generating unit that generates a validation item function based on the functional configuration information and the condition; an extracting unit that extracts a combination of functional devices as a validation item, from the validation item function; and a second generating unit that generates the input/output sequence based on a combination of the validation item and a cost associated with the validation item."

None of the prior art, either taken by itself or in any combination with any other prior art(s), would have anticipated or made obvious the following limitation within the above limitations of the claim which it at least allowable based on the following: " a second generating unit that generates the input/output sequence based on a combination of the validation item and a cost associated with the validation item."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
